MARKET COMMENT - MORTEN E. ASTRUP (CHIEF INVESTMENT OFFICER)

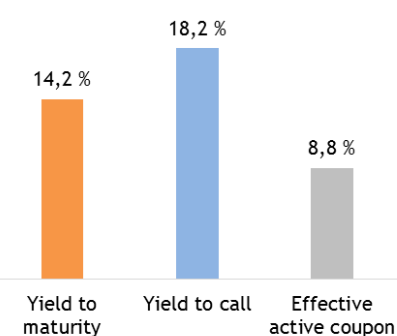

Dear investors,

The strong news flow for the portfolio continued in April along with tighter spreads in general for our part of the market from historic low levels. Amongst our biggest gainers were a Transocean Bond expiring in 2031 that we bought at half price in April. Transocean is as we see it regarded as the last man standing and they have long term financing in place. Between all the good news Prosafe fired the CEO and announced large cost overruns making a re-structuring coming closer. We welcome a restructuring in Prosafe as they mainly have a liquidity problem, and a restructuring most probably will create value for the bond holders. A consolidation of the accommodation market is our preference.

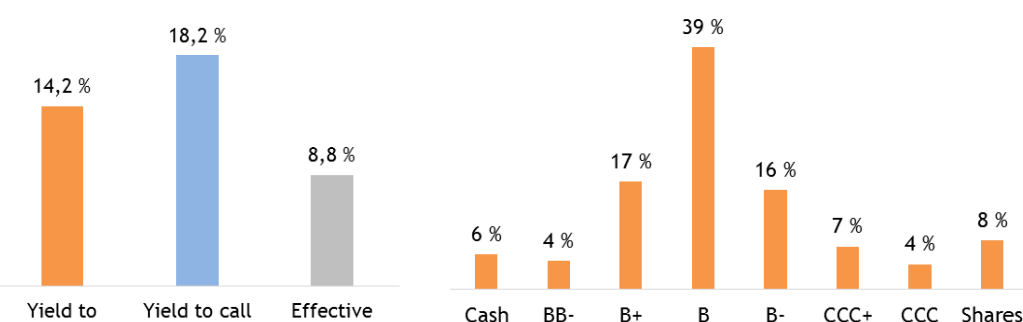

In April the oil market experienced strong headwinds where several OPEC producers signalled higher, rather than lower production. However, as US Shale production continues to decline the big picture signals balance in the oil market in Q4 2016.

The effective active portfolio coupon is currently 8.8%, while the yield to maturity is 14.2% and yield to call is 18.2%. Yields above 30% are regarded inflated and therefore not recorded in full.
